- Position the sofa at least 50 cm. from sources of heat such as heaters or radiators.
- Avoid exposing the sofa to direct sunlight or too powerful lamps to ensure the colour of the covering remains bright.

- To remove dust, brush delicately using a brush with soft bristles or use a vacuum cleaner at a medium power output setting using the most suitable accessory supplied with the cleaner and taking care not to rub the accessory directly against the covering.
- To maintain the aesthetic appearance it is advisable to treat each stain immediately before it is absorbed excessively: this will avoid prolonged or abrasive treatments being required.
- If it is found necessary to use solvents, avoid applying the solvents directly on the stain. Pour the solvent onto a clean cloth: each treatment should first be tested on a hidden area of the sofa covering.
- Clean the stain by adopting a circular movement, working from the outside towards the centre.
- Always take care to rub each stain delicately.
- If you purchase a new sofa, with a covering that is an identical article and/or has the same colour as a sofa that you already own, it is possible that you may note slight differences in shades of colour between the two.

- Important Fabric Care Information:** Fiber Transfer During everyday use, friction from clothing, blankets, or throws may cause small fibers or lint residues to appear on the sofa's surface.
- **Natural Occurrence:** Please note that this is a natural transfer of loose fibers from other textiles and is not considered a product defect.
 - **Visibility:** This effect is especially noticeable when fibers from darker clothing transfer onto a lighter-colored sofa.
 - **Prevention & Care:** To minimize this effect, avoid direct contact of the sofa fabric with coarse, heavy, or easily shedding textiles.

Don't sit on the armrests, the backrest or the edges of the seat.

Don't stand or allow kids to jump on the sofa.

Do not place heavy objects with sharp edges on the furniture.

Do not tilt or rock.

Don't push.

Don't pull.

Don't lift by yourself.

Lift with another person.

Back cushion

...at least once a week!

Unzip the back cushion. Take out the filling, plump and knead it until it gets straight and flat. Then put the filling back into the cushion cover. Put your hands inside and move the cushion filling from the middle to the corner. Repeat this on both sides. Then zip the cushion, plump and knead it again.

i Use all same steps for deco and other pillows.

delicately plump and knead all 4 edges of the cushions.

Grab the corners of the cushion and delicately stretch them outside. Repeat this with every corner.

Back cushion

GRAFU

...at least once a week!

Plump and knead the cushions to make the surface flat.

Move cushion wrinkles from the middle to the sides.

Finish by delicately pushing wrinkles from the sides to the corners.

Armrest

...at least once a week!

Move armrest wrinkles from top to bottom.

Move armrest wrinkles from front corner to back and to bottom.

...at least once a week!

SEAT TYPES

Flippable

Non flippable

Fixed

If your sofa has flippable seats and cushions, flip it at least once a week. If not - skip this step.

Plump and knead the top of the seat to make it flat.

Plump and knead the front of the seat to make it flat.

Move wrinkles from the middle front to the back of the seat. And from front sides to back.

To make your piping strait. Strongly grip it with your fingers and move your hand to the corners of the cushion or seat.

Sectional connection

Single parts are connected with sectional connectors.
Push one part with a connection to the other.

Single parts are connected with hooks. Put one part hooks to others.

Hook rotation

In case of modules can't join it is necessary to turn hooks upside down. In that case, follow the steps.

- 1 - Unscrew bolts and remove hooks from the frame.
- 2 - Rotate hooks upside down.
- 3 - Screw hooks back to the frame.

1 - Remove bolts and washers from armrest.
It will be used to screw armrest to a frame.

2 - Unscrew bolts and remove hooks from the frame.

3 - Flip the frame and armrest on its back.
Connect the armrest to the frame and screw in bolts with washers to the armrest.

The function of the washers on a sofa is to level it, ensuring it stands straight and stable on the floor. Factors that can affect the sofa's levelness include the unevenness of the floor, the type or condition of the fabric or material under the sofa, and any shifts or impacts during transportation. To achieve a level stance, you can use 1 or 2 washers per leg, or none at all, depending on the individual leg's height requirement. For instance, one leg might require 2 washers to be raised sufficiently, while another may not need any.
